CONCLUSION In this paper, a system architecture and method for next generation wireless user equipment, or 5G cellular user equipment design has been provided. By analyzing the challenges of contemporary wireless UE designs and emerging 5G mmWave techniques, a novel DPA-MIMO architecture and design method has been presented to overcome the limitations of conventional MIMO structures. This ... 5G Cellular User Equipment: From Theory to Practical ... This is a PDF file of an unedited manuscript that has been published in. Wireless Personal ... Section 3 reviews a number of enabling technologies for 5G and discusses the related ... requirements that must be met for a next generation cellular netwo 5G Cellular User Equipment: From Theory to Practical ... This work was supported in part by the NSERC of Canada under Grant 261524. The work of W. Xu was supported in part by the NSFC under Grant 61471114 and in part by the Six Talent Peaks Project in Jiangsu Province under Grant GDZB-005. The authors would like to acknowledge Natural Sciences and Engineering Research Council of Canada, and National ... 5G Cellular User Equipment: From Theory to Practical ... In this paper, we first investigate the contemporary wireless user equipment (UE) hardware design, and unveil the critical 5G UE hardware design constraints on circuits and systems. On top of the said investigation and design trade-off analysis, a new, highly reconfigurable system architecture for 5G cellular user equipment, namely distributed phased arrays based MIMO (DPA-MIMO) is proposed ...
