However, most of these functional groups show other diagnostic absorptions that assist in Chapter 13: NMR Spectroscopy - University of Northern ... different functional groups will absorb at different fields (because of the difference in dipole moment). This can be used to identify the structure of molecules. The chemical shift: Measured in parts per million. Ratio of shift downfield from TMS (Hz) to total spectrometer frequency (MHz). The chemical shift has the same value regardless of the machines (same value for 60, 100, or 300 MHz ...
