You can check them out on the faculty page of Prof. Chen. Reversible computing - Wikipedia Reversible computing is a model of computing where the computational process to some extent is reversible, i.e., time-invertible. In a model of computation that uses deterministic transitions from one state of the abstract machine to another, a necessary condition for reversibility is that the relation of the mapping from (nonzero-probability ... Measurement of carrier lifetime in micron-scaled materials ... The measurement of minority carrier lifetimes is vital to determining the material quality and operational bandwidth of a broad range of optoelectronic devices.
