A Note on Characterizations of the Exponential Distribution* The three main generalizations of the exponential distribution are the gamma distribution, the Weibull distribution, and the generalized exponential distribution. Denote these three families by G , W , and Eg respectively. Thus, G is the set of all distributions with the probability density function $f(x) = \lambda e^{-\lambda x}$ for $x \geq 0$. A Note on Characterizations of the Exponential Distribution* Their common distribution is exponential if and only if random variables X_1 and X_n have the same distribution. In this note we show that the characterization can be substantially simplified if the exponentiality is characterized within a broad family of distributions that includes, in particular, gamma, Weibull and generalized exponential distributions. (PDF) Some new characterization results on exponential and ... It is well-known that most of the characterization results on exponential distribution are based on the solution of Cauchy functional equation and integrated Cauchy functional equation. [PDF] Exponential Distribution Download eBook for Free Download The exponential distribution is one of the most significant and widely used distribution in statistical practice. It possesses several important statistical properties, and yet exhibits great mathematical tractability.
