Origin and evolution of life - SlideShare Origin and evolution of life 1. Origin and evolution of life Origin of life : Theories of the origin of life, early earth, modern self assembly theories, Oparin-Haldane theory of chemical evolution of life. Organic evolution : Darwin's theory, modern synthesis theory of evolution, geological time scale. Origin and evolution of human being. 1. Origin of life - BIOLOGY4ISC Chemical evolution: Formation of simple organic compounds. After cooling, the primitive inorganic molecules of earth interacted and combined with one another to form simple organic compounds.
