Computational number theory and modern cryptography are two of the most important and fundamental research fields in information security. In this book, Song Y. Yang combines knowledge of these two critical fields, providing a unified view of the .... Cryptography: An Introduction (3rd Edition) The third edition contains a number of new chapters, and various material has been moved around. • The chapter on Stream Ciphers has been split into two. One chapter now deals with the general background and historical matters, the second chapter deals with modern constructions based on LFSR's. The reason for this is to accommodate a major new section on the Lorenz cipher and how it was ...
