Choked flow - Wikipedia Choked flow in liquids. If the fluid is a liquid, a different type of limiting condition (also known as choked flow) occurs when the Venturi effect acting on the liquid flow through the restriction causes a decrease of the liquid pressure beyond the restriction to below that of the liquid's vapor pressure at the prevailing liquid temperature. Trey Walters, P.E. Applied Flow Technology - aft.com Cover Story Flow of gases in pipe systems is commonplace in chemical-process plants. Unfortunately, the design and analysis of gas-flow systems are considerably more Accumulator selection - EPE Italiana 3 Accumulator selection 8 3.4.1 Volume compensator (isothermal) A typical example of calculation in the isothermal condition is when the accumulator is used as a volume compensator. Fluid dynamics - Wikipedia In physics and engineering, fluid dynamics is a subdiscipline of fluid mechanics that describes the flow of fluids—liquids and gases. It has several subdisciplines, including aerodynamics (the study of air and other gases in motion) and hydrodynamics (the study of liquids in motion). Boiler feedtank systems - Spirax Sarco 2 In both cases the make-up water has to be softened and treated to prevent scale formation on the boiler heat transfer surfaces.
