Reliability engineering - Wikipedia Reliability is defined as the probability that a device will perform its intended function during a specified period of time under stated conditions. Mathematically, this may be expressed as, $R(t) = 1 - F(t)$, where $F(t)$ is the failure probability density function and t is the length of the period of time (which is assumed to start from time zero).. There are a few key elements of this definition: Educational technology - Wikipedia Educational technology is the use of both physical hardware, software, and educational theoretic to facilitate learning and improving performance by creating, using, and managing appropriate technological processes and resources .. It encompasses several domains including learning theory, computer-based training, online learning, and where mobile technologies are used, m-learning.
